## GLOBAL SUPERVISOR

The supervisor gives the plant manager realtime access to all information from the various systems. It gathers processing, administrative, and management information.

### THE PROCEDURE

- Enables visualization of all milling sectors
- Manages equipment parameters
- Displays and manages production schedules for all milling sectors

### ADMINISTRATION

- Approval of recipes before production takes place
- Receiving management
- Orders management
- Loadout management for invoicing
- Finished product and ingredient inventories
- Contact management

### MANAGEMENT

- Provides access to all reports
- Updates the inventory (in real time or deferred)
- Manages user permissions
